INSIDE EVERY LESSON PLAN

- The specific learning outcomes, key inquiry question, core competencies, values and PCIs, and the resources needed.
- A timed lesson flow: what the teacher does and what the learners do, from introduction to summary.
- The key content (a worked example, notes or a practical with its expected results), then four practice questions with the answers for the teacher.
- The common mistake to watch for, and ideas for learners who need support and for those ready for more.
- A four-level CBC assessment rubric (EE, ME, AE, BE), homework, and a blank reflection space to fill in after teaching.

A TASTE OF LESSON 1

What visual programming is

By the end of the lesson, the learner should be able to: a) define visual programming; b) name visual programming tools

Programming with blocks

A program is a set of instructions a computer follows. Visual programming builds programs by snapping together blocks instead of typing code.

Tools: Scratch, ScratchJr, Blockly, MIT App Inventor, Code.org.

You also receive this pack as an editable Word file, so you can change any lesson to suit your class before you print it. Lessons follow the order of the KICD curriculum design.
